DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Title:

The title has been replaced with "Tiled display comprising faceplate and displays with at least one defective pixel and method of manufacturing said tiled display".

End of examiner's amendment.

Allowable Subject Matter

2. Claims 1-32 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art [see, for instance, Figs. 11 and 12 of U.S. Patent No. 4,874,227 to Matsukawa et al.] discloses a tiled display comprising a) a plurality of flat panel displays [8] with pixels [11] arranged in an array; and b) one or more faceplates [13] in alignment with a plurality of flat-panel displays [8], having a plurality of lightpipes [12] in an array, with input end faces having an area larger than the area of one pixel [11] of the flat

panel display, and each lightpipe transmitting light from more than one pixel to the display surface of the tiled display. However, the prior art does not disclose the remaining limitation of claim 17, that each flat-panel display has at least one defective pixel. Instead, the prior art [see, for instance, U.S. Patent No. 5,654,781 to *Izumi* (col. 1, lines 32-41), U.S. Patent No. 5,889,568 to *Seraphim et al.* (col. 1, line 52 – col. 2, line 19), and U.S. Patent No. 6,259,838 to *Singh et al.* (col. 1, lines 12-54)] teaches that such tiling of small flat panel displays is done because single large displays are more likely to have such undesirable pixel defects, while the smaller modular displays can and should be (less expensively) discarded before the tiling process if such pixel defects are found. Claim 17 is therefore allowed, as are claims 18-32 which depend from it.

Similarly, the prior art does not teach the method of manufacturing such a tiled display comprising in particular the step of selecting a plurality of flat-panel displays each having at least one defective pixel. Claim 1 is therefore allowed, as are claims 2-16 which depend from it.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 2004/0001679 to *Sisodia et al.* discloses fiber optics from display panels to a projection system.

U.S. Patent No. 6,618,115 to *Hiroki* discloses a compensation system for defective pixels.

U.S. Patent No. 5,251,280 to *Asada et al.*, U.S. Patent No. 5,465,315 to *Sakai et al.*, and U.S. Patent No. 5,572,034 to *Karellas* disclose fiber optics from display panels to a single tiled display surface.
